

KSHITIJ PATIDAR

Generative AI · Agentic AI · LLM Engineer

+91 7224022231 · kshitijpatidar2003@gmail.com · [LinkedIn](#) · [GitHub](#) · Indore, India

SUMMARY

Computer Science graduate (2025, CGPA 8.93) specializing in Generative AI and Agentic AI systems. Experienced in designing RAG pipelines, multi-agent orchestration with LangGraph, and deploying LLM-powered applications end-to-end. Passionate about building autonomous AI agents that reason, plan, and act.

EDUCATION

B.Tech — Computer Science & Engineering · [Vellore Institute of Technology, Bhopal](#) · Sept 2021 – Sept 2025 · CGPA: 8.93/10

TECHNICAL SKILLS

Languages: Python, SQL, C++

Generative AI: LLM's, RAG, Agentic AI, Multi-Agent Systems, Prompt Engineering, Vector Database

Frameworks: LangChain, LangGraph, HuggingFace Transformers, Streamlit, FastAPI

Tools: Git/GitHub, Google Colab, VS Code, Streamlit Cloud, HuggingFace Spaces, Claude Code, N8N

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management System

PROJECTS

AutoResearch Agent — Autonomous Multi-Agent Research System · [LangGraph](#) · [Gemini API](#) · [Tavily](#) · [Streamlit](#) · [\[GitHub ↗\]](#)

- Architected a multi-agent pipeline using LangGraph with specialized agents for planning, web search, synthesis, and citation enabling fully autonomous research report generation from a single user query.
- Implemented a ReAct-style reasoning loop with tool calling (Tavily Search, Gemini) giving agents the ability to self-correct and retry on low-confidence outputs.
- Deployed on Streamlit with real-time agent thought streaming, giving users visibility into each agent's reasoning step mimicking production agentic AI UX.

AskDoc — Conversational RAG Agent over Documents · [Python](#) · [LangChain](#) · [Gemini API](#) · [ChromaDB](#) · [Streamlit](#) · [\[GitHub ↗\]](#)

- Built an end-to-end RAG pipeline with multi-format document ingestion, semantic chunking, and hybrid retrieval over ChromaDB with source citation in every response.
- Integrated re-ranking and context compression to reduce hallucination and improve answer grounding across diverse document types.

Gemini Curriculum Generator — Learning Path Builder · [Python](#) · [LangChain](#) · [Gemini API](#) · [Streamlit](#) · [\[GitHub ↗\]](#)

- Integrated NLP techniques to generate structured learning paths, enhancing personalized content delivery.
- Applied prompt engineering to structure outputs and reference research papers, EdTech platforms, and educational websites.

SoundSoothe — Real-Time Emotion Music Recommendation · [Python](#) · [TensorFlow](#) · [OpenCV](#) · [YouTube API](#) · [\[GitHub ↗\]](#)

- Built a real-time mood-based music app using CNN and OpenCV for emotion detection, achieving 85% accuracy across 4 emotion classes.
- Mapped detected emotions to personalized music via Last.fm and YouTube API's.

LEADERSHIP

AI Team Lead · [AI Club, Vellore Institute of Technology, Bhopal](#)

2022 – 2023

- Spearheaded AI Crypt (100+ participants, ₹30K sponsorships); mentored 15-member team in ML prototyping and deployment; grew club participation by 40%.
